

Dear Neighbor:

We are writing to update you on the construction of the Bay Park Conveyance Project. The Bay Park Conveyance Project is a partnership between the New York State Department of Environmental Conservation and the Nassau County Department of Public Works. Western Bays Constructors (WBC) is the design-builder for this innovative Project.

The Project will convey treated water from the South Shore Water Reclamation Facility at Bay Park (formerly known as the Bay Park Sewage Treatment Plant) to the existing Cedar Creek Water Pollution Control Plant's (WPCP) ocean outfall pipe, which discharges and diffuses treated water three miles offshore in the Atlantic Ocean. Construction involves underground microtunneling within your community. Microtunneling is a safe, effective way to install piping deep into the ground, avoiding long trenches and surface disturbance.

Location of Cedar Creek Shaft 2 and Cedar Creek Shaft 1 at the Cedar Creek WPCP in Wantagh

Cedar Creek Shaft 2 (CC2) and Cedar Creek Shaft 1 (CC1) are located at Cedar Creek Park within the footprint of the Cedar Creek WPCP. As construction in the park continues, we want to give you as much information as possible. Here's what you should know:

Construction Activity Update:

Construction crews have begun transporting materials including large segments of pipe to the site of CC1. The materials and pipe will support microtunneling activities, which will progress deep below the ground from CC2 towards CC1. This microtunneling drive is expected to begin end of September and continue through the month. Operations will take place six to seven days a week.

Since CC1 and CC2 are within the Cedar Creek WPCP, use of the area is not expected to impact park-goers, but a consistent presence of construction vehicles and crews will be present in the area. Park-goers will notice increased construction activity, equipment, and personnel in and out of the park.

Through a dedicated Community Outreach Program, WBC is committed to a robust engagement process and to maintaining an open line of communication throughout construction. We are also committed to minimizing disruption to neighborhoods affected by construction. WBC's Community Outreach Team will be available to answer questions and act as a project liaison throughout the duration of construction.

For more information on this project element, we encourage you to visit our website www.BayParkConveyance.org and Facebook page [@BayParkConveyance](https://www.facebook.com/BayParkConveyance), and register for [email updates](#). Our Community Information Center is located at 265 Sunrise Highway in Rockville Centre. Please visit our website for hours. You may contact us via the Project's 24/7 hotline at (516) 252-6121 or email us at BayParkConveyance@gmail.com with any questions.

Respectfully,

Margo K. Cargill
Community Ambassador
